## DETAILED ACTION

### *Election/Restrictions*

This application contains claims directed to the following patentably distinct species:

Specie I: claims 1-2, 12-13, 15, 21, related to automatically applying user preference obtained from **an external source such as a database**.

Specie II: claims 3-4, 16, related to automatically applying user preference obtained from **a second appliance**.

Specie III: claims 5-6, 17, related to applying **historical user preference applied by a prior art mobile computing device**.

Specie IV: claims 7, 18, related to **controlling an unrecognized appliance**.

Specie V: claims 8, 19, related to controlling **a plurality of appliances**.

Specie VI: claims 9-11, 20, related to setting and applying **default** user preference using **human sensory parameter**.

Specie VII: claim 14, related to **a user preference database structure**.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
